TEN MILLIONS O & T 'PREFERRED"

Obedient Employes of the N. P. at Portland Carry Out 7:llard's Orders.

INJUNCTION GRANTED IN NEW YORK

Specalations as to the Purpose of Villard's Proceedings and Their Probable Results-The Laws of Oregon in the Premises.

New York May 1"—There is great commotion here in matters relating to Northwestern railroad interests. The full facts are difficult to get at, but it is learned that the contest for control of the Oregon Railway & Navigation Company through the Oregon & T anscontinental has led to proceedings which have produced great excitement among those it lerested and which are denounced by the anti-Villard party as extraor dinery and filegal. It is well known that the Northern Pacitic party in the Oregon & Transcontinental baxe longs been tring to use that company for control of the ORAN Recently there has been a proposal to meet this effort by instituting legal proceedings directed against the OAT contesting its right as a corporation on grounds of public policy to be a holder of the stock of other corporations. O d.T contesting its right as a corporation on grounds of public policy to be a holder of the stock of other corporations. It is believed by many that in this way the O d.T could be prevented from voting its holdings of O R & N stock and that the Smith narry thereby could hold control as against the Villard party. To meet this proceeding as as supposed, Villard sent orders to his board of directors of the O d.T. in Oregon among whom are said to be Schulze land agent of the Northern Pacific Chariton passenger agent of the Northern Pacific Chariton passenger agent of the Northern Pacific at Portland Hansen im migration agent Fulton, freight agent Hail, agent of the Northern Pacific at Portland Hansen im migration agent Fulton, freight agent hail, agent of the Northern Pacific Express Company, and Tyndale secretary of the company, fastructing them to authorize and direct the issue of \$10,000,000 in additional stock of the O & T, which is to be put in the hands of a trustee to be held and voted as Villard may direct, and this slock is to be preferred to all previous issues, and is to receive an annual dividend of 6 per cent, thus cutting the regular slock, our and taking up most of the annual surplus of the O & & N caraings.

on a per cent, man cutting use regular stock, out on taking up most of the annual surplus of the O R & N caraings.

In this movement two objects are supposed to be in view. One of them is to get an issue of stock to be voted in the "oming election in Or special stock to be voted in the "oming election in Or special stock to be voted in the oming election in Or special stock to be voted in all contingenties to the Villard party, the other to pass the garnings of the O B & N into the control of the preferred stockholders of the Villard party. But the opposition have met his to duty by applying for an injunction against the issue of the proposed stock, and a tompo ary order to that effect has been granted.

Parties in interest who have been looking into the statutes of Oregon say that the proposition to issue the proposed stock is clearly illegal under the laws of the state, and that injunctions will be obtained in the courts there to prevent the stock

to issue the proposed stock is clearly filegal under the law of the state, and that injunctions will be obtained in the courts there to prevent the stock from being voted, if it should be issued. The authorized capital stock of the O. d. T is \$4.000, 000, of which \$40.000, 000, two hithers been issued but it is said that the laws of Oregon recognize no such thing as preferred stock and that the at tempt to cut off the so-tailed common stock of the O. d. T from the benefit of the earnings of the O. R. d. N. will certainly at I. It is understool that the Villard board of directors of the O. d. T. held their in eting at Pirtland on Friday, to obe hence of a telegram from Villard, and passed a resolution as diffations, and preferred stock and also a risolution and preferred stock and also a risolution among the by laws so that no one representing thes than one quarter of the entity, capital stock shall have access to its brooks or records for I is pacifion thereof or for any purpose whatever. It is said that this section is also in direct combiet with the laws of Oregon, which provide that any such holder, ered for or other person interested may have at all times access to the books and records of any corporation.

The anti Vil and party claim that the evident purpose of villand a proceedings is to hamper the O. K. & V. to prevent it from building into territory claimed by the Northern Pacific, to divert the business of the Northwest to Northern Pacific lines, and to lapter the D. R. & N. and its button Pacific connections. The question simply is whether the Oregon road shall be operated on an independent basis or be made to subserve the purposes of the Northern Pacific Inc. contrology may be the forerunner of a great railroad war, fought not only in the hold but in the courts. The Northern is cutting into the business of the Oregon company at all possible points, and the Oregon company is retailacting by extending its lines to Spokane Falls and other points in the Northern Pacific country. In all probability there will be executing

A Temporary Check Placed Upon the Schemes of the Villard Interests.

New York 1847 13—At the suit of Edward R Rill and Eliyah Smith Judge Heinett of the supreme court, to-day issued an injunction restraining the Oregon & Transcontinental Company and Henry Villard, president, from issuing ten millions additional slock of that company, to be known as preferred stock, with 6 per gent dividence of the Navigation stock held by the Transcontinental Company by mortgage pledge or otherwise for the purpose of guaranteeing dividends upon such preferred stock.

other directors present toted against the resolu-tions.

Punistiffs, who furnished the forgoing in-formation, believe that the Oregon d Trans-continental has no authority in law to-give such preferred right to any portion of the stock. It is asserted that Villard's purpose was to-place the stock where he could control its proxies and the election on the third Monday is June and also, with the money thus obtained to increase the amount of Northern Facilic shares now help by the Oregon & Tenacyulipenial, to canble him by that means to control the near Northern Pacific election.

THE TRANSCONTINENTAL ROADS The Association to Meet at Tacoma on July 20. The Association to Meet at Tacoma on July 20.

St Louis, May 15 — The Transcontinental Association concluded its labors here this afternoon The committee to which was referred Puget sound rates on Saturday last, reported to-day that they were unable to agree on a settlement of the mat ter and the question will be taken up by the association at a meeting to be held at Tacoma July 20.

The association passed a resolution to continue negotations with the trunk lines in arranging a percentage of division on east bound trains. They also fixed the rate for the tritumial conciavo of kinghts Tempher to be held in Washington at 80 for the round trip from California to the Missouri river the through riste to be based on rates east of that river.

J. S. Leeds tendered his resignation as chairman of the association which was accepted, and James Smith general agent of the association at hew kork will be transferred to the head quarters here to take charge of affairs pending the election of a chair at the late of the late of the property of the control of the property of the control of the late of the late

Kills Four Men at Tacoma.

THE RUINS NOW BEING SEARCHED

New York will be transferred to the head quarters here to take charge of affairs pending the election of a chair man to take the place in explanation of this it will be officially amounced to moreow that the resignation of W. H. Newman third vice president and general traffic manager of the Missouri Pacific, which has been several times reported has been several times reported has been accepted to take effect June 1. J. S. Leeds has heen supported traffic manager of the system and the office of their vice president will be absoluted. The association adjourned to meet again at Tacoma July 20. A Dust Storm at Seattle Canaca the Death of a Homeward Bound Farmer a Train Dashing Into His Vehicle.

Tacona W T May 18.—One of the most terrible disisters known in the annals of the Pacific Northwest happened in this city this evening. Four men are known to have lost their lives by this accident several are injured severely, and one, it is believed fatally, and others are missing. A terrible windstorm which came up a few minutes before 6 this evening was the cause of this generation.

A tertible windstorm which came up a few min utes before 6 this evening was the cause of this catastropic. Some months ago Walker Bates a weal by man, arrived here from Seward, Nebraska, and amongat other property purchased two lots at the south-cast corner of Tacoma avenue and Seventeenth atreets, on which he began building a four story building or rather a three story and full basement building with sixty five feet front on Tacoma seauce und 100 feet front on Securiteenth street which he intended for a hotel. The strolers in the building were exceptionally heavy, but unfortunately Mr. Bates who was superintuiting the work himself neglected to put in any braces. The whole framework of the building was up the roof on and the flooring except on the upper floor was laid.

About ten minutes to 6 a rain and wind storm came up and besides the workmen in the building two ministors took shelter therein, while W. If shell son in law of Mr. Bates, who was last the building with his father-in law Suddenly without warming the wind increased to a hurreane, and filled the building frough the windows and basement floor, which was open, and finding no vent forced the walls apart, when the floors and roof full io, while the studding and siding closed in on top, enclosing the workmen and others in such manner as effectually to prevent their emenge.

Eye witnesses of the disaster say that the wind, which came from the southwest, traversing a long open space, suddenly whirled round and round as it rapidly approached the building and then struck it with full force. For a moment a alight tremble could be observed and then it collapsed, burying all those tuside except two, who managed to escape unturt, and one on the roof who full, with it and also had a miraculous escape.

Horrible Disclosures Brought Out by the Jouldan Examination

Chicago May I'—The examination of the insane asylum was begun by the county court this morning. The te timony showed 1000 inmates with room for 000, that the attendance was manifelent and the food bad.

Evidence was latire lineed to the effect that the putters were fed on 19 gs heads for an entire year with potitors for vegetables once a week libere was no service, and the patients fought for the passession of the potatoes with the result that the weak got none and that over fifty of the inmates became affilied with surey.

One of the involval staff testified that In one ward their were twenty-eaght patients with only nine rooms or an average of three in each room in was some of the count, so that our common were growded into others. The beds are two and a half free wide but in many cases two patients would often clumb over the bed and fight, and would often clumb over the bed and fight, and would often clumb over the bed and fight, and it may be state who were attempting to commit murder or sulcule.

This state of affairs was reported to the members

who were attempting to commit moreor or since calle.

This state of affairs was reported to the members of the county board again and again but nothing was done to remedy it. Much other covolting testimons was brought in commissioners this afternoon taked a resolution naming a commutee of pronument efficient for commend a suitable per son to succeed the present superintendent. Dr. Kiernam whose management has been so severely commended upon recently.

The body of Mr Bates was removed to his late home on E street and the others are lying in the undertaking parlors of (). Howls.

The storm passed through between the houses to E street where it struck a new store being erected between Eleventh and Thirteenth, and severely laylared a workman there.

Another new building in the southern part of the city was also demolished.

On the Bound the storm was very acvere.

FATAL ACCIDENT AT SEATTLE.

A Train Dushes Into the Buggy of a Homeward Bound Farmer.

SEATTLE May 12.—Adolph Toelluer, Hying at Julich, about five miles south of this city, was killed at \$50 this evening, by being run into by the Tacoma train at the Grant street crossing, at the licad of the harbor Toelluer had been to Seattle with his daughter in a light wagon and they were returning bome, just about the time for the Tacoma express to come along a sudden squall arose and blew up such a cloud of dust as to render all objects invisible and all noises frandble. Just as the frack was being crossed the truth dashed directly

Both the daughter and horses escaped serious injury
It appears that the dust at the particular point
was so thick that the engineer tifd not see the
sections and went on to Tacoma, nor did anyone
else witness it Help soon cabre, however, and
Toeliner was carried into a neighboring house.
The coronor was summoned, and empanded a
jury to hold an inquest. It was decided however,
to nostopous it till to-shorow. The body was
brought to this sity and pinced in an undertaking
establishment.
Toellner was 45 years of age and was well to-do.
He itaxus a wife and three children.

GLOVES,

The Regular Monthly Conference of the Members Held Last Evening.

Communications Considered—A Letter From Senator Delph-Special Committee's Report-Resolutions Adopted-Vote of Thanks,

A regular meeting of the Board of Trade was hold last evening, President Donald Maclesy in The minutes of the last meeting were read and

From the Board of Trade and cilizens of Port Angeles, W. T., stating that it is reported there that the steamer Idaho Intely put on the Sound route is not going to call at Neah Bay and Fort Amgeles, as first intended, but only at Fort Townsend. The Board of Trade for toursized to endeavor to have these ports included, in the list of places at which the Idaho will call; and is assured that a soon as the convection of established the bulk of the trade will come to persiand.

It is further stated that a paper is being circulated among the methants whereby they guarantee their trade to Fortland on condition of having that freight delivered there without transfer. COMMUNICATIONS.

antic.

President Macleay stated that the communicaon had been answered and that the stamer is
ow calling at the places named, and will con-

To Donald Maclesy, President Board of Trademy Dear Str. 1 an diverse by the charman of the sense committee of the care the committee with Canada to pay that the committee will be glad, while in Portland, to receive statements from yen and two or three other prominent members of the Board of Trade qualified to speak upon the subject, as to the character, extent, present and future prospective value of the trade of Portland with British Columbia, and the effect of the competition of the Canadian Pacific railroad and its connecting line of Steamars plying between Vancouter and ports of China and Japan upon the business thereast Portland, The committee expect to reach Portland about May 18. Sincerely yours.

On motion the matter was referred to a special committing of them

anarests of the marithm community which it represents anneally to recommend to the hear each occurrently to recommend to the hear each occurrent of the treasury that in making the superistic state of the coast occurrent of amperistoned and the superistoned and the superistoned and the superistoned and the superistoned of the coast operations of by drop reportence in the different operations of by drop reportence in the different operations of by drop reportence of the accessition of manuscree and paying the by the green of the superistoned of the superistoned of the superistoned of the superistoned operations of

CENTENNIAL CELEBRATION. President Macleay asked for a report from the entlemen who carried out the business of the entennial celebration attendance.

anial celebration successfully. eral Kapus was called for but had not ar-

General Kapus was came not out men not arrived.

Mr. Dodd reported that the committee of the board had raised funds which had paid off every dollar of the expenditures on that celebration, and called attention to the handsome portrait of General Washington bung behind the preakdent's General Washington bung behind to the board as a sourvenit of had been presented to the board as a sourvenit of the celebration. Ho was happy to say that there were no debiato be paid and that he had heard only words of praise concerning the celebration. celebration.

saident Macleay said he had beard the celeson highly complimented, and that the board
under chilgations to the committee who had
used so much time and attention to making it

don of Mr. E. D. McKee, a vote of thanks inded to the committee. MAINTAINING A PILOT BOAT.

Maintaining a pilot boat on the har was brought up by Mr. McKee. He said there was brought up by Mr. McKee. He said there was a misunderstanding between the pilots, the legislature and the board. The pilots claim that the board queranteed to maintain the pilot best, and that this includes not only paying and feed, and that this includes not only paying and feed, and that this includes not only paying and feed, and that this includes not only paying and feed, and that this includes not only paying and feed, and the saked the beard to look into the matter and say something definite in regard to it.

Captain Noyes produced the letters of Pilot Campbell in regard to the matter in which it was alleged that Messra. Corbett and Thompson pladged the board to maintain the pilot board.

Neither Mr. Thompson nor Mr. Corbett was present, but several members stated that they defined having made such guarantee as claimed. Copadierable discussion followed, the purport of which was that the board would do what it had quaranteed. The question was to find just what this was. If the board had guaranteed to maintain the pilot schoomer it must be done, but it was thought that it was asking too much to require the board to pay the wages of half a dozen pilots, and no one had any loca that the board had undertained the pursues empthing of the sort. It was also the plots could sail her or not, so they pleased the president Maclesy and that if the locard had committed themselves they are the second of the committed themselves they are the second of the committed themselves they are the second of the committed themselves they are they are they are they are the committed themselves they are th

pleaser the pliots of the foard maintain the pleaser the pliots of the provide all her or not, as they pleaser the place of the provide and the provide the provid practicable. Adjourned.

The president Mrs. S. N. Keasey, occupied the chair. After devotions and acripture reading, on the willing workers who built the ancient temple, eripture passages were recited instead of the ties of the previous masting were read and

astrances of the previous race: He were read and approved.

Mrs. Cran reported that Taylor-street M. E. raurch added 324 names to the petition for the suppression of the run traffic on the Gingo.

A circular letter was read from Miss Fugh, national W. O. T. U. treasurer, asking every union to send 41 and a 40ting motio for Miss Willard's galden bitchelay. An order was fraum for the same and a committee appointed consisting of Mrs. Readen, Mrs. Ogden and Mrs. Keasey to arrange the motions.

Mrs. Rankin, Mrs. Ogden and Mrs. Keasey to arrange the motions.

The consultation on railing Mrs. Washington to accure in Portland, moorted they had conferred with Dr. Gorden, who invites her to lecture in the First Rapitst church any Wednesday or Friday svening. Dr. Gorden, also, with bis wife, invites her to be a guest at their home during her stay. A circular lotter was received from the state president. Mrs. A. R. Riggs, containing advices and suggestions relative to the coming state convention: the letter was accepted and acted upon. The report of Mrs. Ogden on Union Signal was received and approved.

Mrs. Vessay the proposition before anylons.

for lack of means.

The financial committee will be required to
work up a plan immediately after the convention.
This committee consists of Mr. Cran. Mrs. Ran-kin. Mrs. Mattie Townsend and Mrs. Shane. Ad-louened.

PORTLAND'S CHINESE ACTORS.

and Interviewed.

and Interviewed.

The Chinese theatrical company organized in this city by Lee Toy some three weeks ago, has been heard from at St. Paul on their way to New York, where their intentious is to greet a temple of Thespis and play their wild and 'woolly dramas to the delight (?) of all New Yorkers. A reporter of the Minneapolis Tribuae encountered these worshipers of Joss in the union depot at St. Paul, and in a late issue, under the caption of 'Performing Heathen,' this journal pays them a handsome (?) compliment. The appended article gives the result of the reporter's interview:

"Mo lun theater, aline asme Mellann man," was the remark of Wing Ping in the union depot resordar. This speaker was the leader of a Chinese theatrical coupe on its way from Portland, Or. Device was a Chinaman of comfederable intelligence, from the European point of view, and

though somewhat reticent, advanced a few ideas about Chinese theatrical life. The company will play in a Chiego theater, established for the benefit of the celestials of that city.

Wing Ping's company is a barantorming aggregation of the highest type. In their reportory they include plays of every variety. The plays are usually of the historical order, reciting the valiant deeds of the arrity rulers of China, or of the mythological order, the "devil" generally being considered the leading man of the company. This Tso is the gentleman who usually assumes the role of Wing Ping's coloses aggregation. The males assume the female characters.

The plays have very long titled, like "The Celestial Princess Wang Hong To and Hot Mother, the queen of China, the Danghton of the Sun, and low They Conquered the Bragons of Wo Ling." The plays generally last from six weeks to as many mouths, but Wing Ping obtained some American ideas while in the isunder business in Fortland, and accordingly will think his plays in Portland, and accordingly will think his plays in Portland, and accordingly will think his plays in Colosed to the layers to learn another place, or else unother players to learn another of China's classific plan productions. The China's classific plan productions. The China's classific plan productions. The China's classific plays province and the careful plays and players to learn another of China's classific plan productions. The China's classific plan production

## THE STEAMER ALLIANCE.

The Underwriters Make an Official Survey-A Dredger at Sea-The Coloma Discharging.

Captain F. S. Bosworth, representing the American, and Captain George Pope, representing the English Underwriters, visited the steamer Alliance, which is being hauled out at the head of Sauvio's island, yesterday afternoon, for the

ance, which is being hauled out at the head of Sauvio's island, yesterday afternoon, for the purpose of making an official survey of the vessel to assess the damage, accompanied by Mr. Fred R. Stroug. Captain L. A. Balley, Mr. John Steffen and an Obegonian reporter.

The steamer was found resting easily in the acft clay bank, about half out of water. In the partiales, shortly about of the foremest is a "wound" about eight feet long, extending into the vessel's hall to wittin a few inches of the seel.

The part of the hull containing the break is entirely ont of water, and the main point to be rousidered was whether the vessel be repaired where abe layed, be hauled upover the bank on to the level ground, or hauled off and taken to Mr. Steffen's boat yard. The survepors being auxious to go at the work in an economical manner and put the vessel in first-class repair, decided to have her hanled up on level land. If the break was related was related to satisfactory and she would always be more or less strained.

At present there is at least 160 tons of dead weight in the Alliance, which will be removed.

not be satisfactory and she would always be more or leas strained.

At present there is at least 150 fons of dead weight in the Alliance, which will be removed before sile is haded out any further, if possible. A barge will be sont down to-day to take out the coal and a steamer to pump out the water which covers the machinery and wal. It will take about four days to hau the steamer to the desired place, when a large force of ship carpenters will be put on the work, which will be pushed as fast as possible. It is expected to have the repairs do by June 1. Support and the state of the place who was near as can be estimated, about \$1000 to the Alliance in as good condition as abe was the major of the property of the carpo is between \$10,000 and porturnate collision will the Danubu The owners of the Alliance have given proference to the damaged eargo and carried it to its destination free of charge.

Captain Ackies, of the steamship State of Call

its destination free of charge.

Captain Ackier, of the steamship State of California, which arrived in Sunday night, says that on his way up Friday night at 11 o'clock, near Capo Mendocino, he sighted the steam tug Vigilant, with the steam drodger in tow, which is being taken from San Diego to Tasona. The dredger is being taken from San Diego to Tasona. The dredger is being taken to the latter city for the purpose of improving the harbor. Mr. Lyons, the gentleman who has the confirst; chare up our like State and last yestelday marning for the Sound, where he will prepare to beginning the work.

On the following day, at 7.39 in the morning. Captain, adulty passed a boil buoy satisfi. The cage and bell were in good order, but no letters or aumbors were discontible. He did not sight the Alaskan, which left out forer the Columbia theo Alaskan, which left out forer the Columbia theor har at soon Saturday, and that vessel smust have been more than seven nijes further out to sea than the salling course of the state. The Alaskan should have been aighted near Yaquina bay by the State Saturday night.

The snagboat Willamette made a good run the rejuding.

Ayoung man formerly known in this city by the name of Perry, but who now gives his name as R. Clinton, bad an examination in Justice Tuttie's court yesterolar as a camination in Justice Tuttie's court yesterolar and a camination in Justice Tuttie's court yesterolar and the following the false pretenes \$10 from 10 frown after he had been discharged from the Jirown after he fall in the sected as solicitor. All for a goal skill.

The case of Ernest Gross, charged with larceny by ballee by Thomas Sheridan, came up in Justice Phelan's court vesterdidy after noon. On November 15 last Shoridan gave Gross goal skin valued at \$3, which the latter was to a goal skin valued at \$3, which the latter was to a for the dressing and return the hide, did not do so, but simple was the tanner that the hide belonged to Sherita in Gross, who was to have paid for the dressing and return the hide, did not do so, but simple of the tanner that the hide belonged to Sherita in Gross, who was to have paid for the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return that the hide belonged to Sherita in Gross, who was to have paid for the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and return the hide, did not do so, but simple of the dressing and the pr

by by the Sinte Saturday night.

The snagboat Willamette made a good run the other day. She left here late Friday afternoon, steamed to the mouth of the Lucktamute, got a seow and towed it back to Porthand, arriving Sunday evonling. This is first-rate time, considering the currents on the Upper Willamette. She was not expected here until yesterday morning. She lott down for St. Helens yesterday afternoon. A force of carpeniers was at work fitting up a sinterioum into a very neat lavatory. The steamer will go down he river for the purpose of pulling some snags which have recently drifted in the way. On the forward main deck is placed a derrick, which is operated by steam. The steamer has been paluted pure white and is kept as clean throughout as a parlor.

The Coloma commenced discharging her cargo The Coloma commenced discharging her cargo of Chinese and Japanese merchandise yearcolley morning. Among other things are 6000 boxes of five crackers which will be distributed around town shortly before the glorious Fourth of July. After all, the Fourth of the seaso very far away the committee having the seaso very far away the committee having the the fourth of July. After all, the Fourth season will be presentative citizens to discuss the preliminary steps toward a celebration of the day such as has never been witnessed in this city.

The British bark Martha Fisher left down for Astoria yesterday, where she will take on the balance of her cargo for the United Kingdom.

### JUDGE WILLIAMS DID NOT QUALIFY. Mr. Joseph Holladay Desires to Bee Mrs. Smith Appointed Gaardian.

Appointed Guardian.

When Hon, George H. Williams appeared before County Judge Cattin yesterday morning to quality as guardian of Ren and Linda Holladay the court was not prepared to silow him to enter upon his duties. The attorneys for Joseph Holladay Threatened of the affidavits in the event of the emphasized the entitled of the sepondates, Judge Williams says he is not the sepondates, Judge Williams says he is not seen that the squardian of the children, and the success of the children appointed guardian. "If Mrs. Smith is selected," he said yesterday, "I will adopt the children and provide for their future. I will also send them to the best Catholic school in the East to be educated. It was the wish of their father and mother that they be so educated."

Mr. Reuben Alexander, of Pendleton, is in the

PORTLAND, TEESDAY, MARIA. COAST AND INTERIOR.

Says the Astorian. When the capitalists interested exclusively in Portland cease to have influence sufficient to prevent a railway reaching Astoria the malaria soaked inhabitan's of the interior will be able by a few hours of travel to draw on the ocean and its breezes for health and relief and both Portbreezes for nealth and refler and both For land and Astoria will be benefited thereby This is rather 'spirited's writing

But it will be news up this way that con struction of a railroad to Astoria is pre-vented by capitalists inferested ex invest Is there is a 1, one in Portland on this tor other person who wouldn't be also to 4 cars for deconstructed to Astoric fire Open open not only does not have the bonor of h s acquaintance bat has

A good many of us do like to go to Astoria and to the ocean side during the hot set on and we as so said it is small it can be that the distance should orget that we have in the Columbia river a highway unsurpassed on the globe And so much more agreeable and comfortable as at particularly during the hot season when we want to go to the sea

forms that 'for many persons especially invalids and those who demand thoroughly comfortable and highly finished surround ings, abundant supplies of fresh fruits ex cellent water as an essential item, and all the enjoyments that ready and frequent communication with the communication with the outside world can give, Astona could be used a paradise. A magnificent hotel on the summit of the end of the pennasula, or at Tongue Loint, with the ground receding on three sides and a grand on look over bays and ocean and up the river would make a summer resoft not to be duolicated enjwhere on the North delightful mean between the heat of the inthat they who are in rugged health and not sensitive even to changes so great are the only ones who can be quite comfortable. At Astoria t is sufficiently cool but not chill and logs so common at the bench seldom prevail at Astoria. And since Astoria is these accommodations. Astorla ought to enlarge and further improve, in all possible

the Pacific as well as the San Francisco of the Northwest. The splended water now furnished the city will always attract sum mer visitors who drynd the interior water of the immediate east ore. Many such visitors bor those who wish the latter the Astoria and For those who wish the latter the Astoria and Bouth Coast road will afford dutly fa inlited. Perhaps do the I waco company my discard their present terminus and extend therr line to a point opposite Astoria Te a hotel situated on the Astoria highlis the move ments of vessels and shipping on the rivers and bars will a with add a charm much the sound the present of the percentage of Jensey was the solid brains so the presentation of the percentage of Jensey was also do the percentage of Jensey was the solid brains and the best for a presentage of the percentage of Jensey was the solid brains which is the presentage of Jensey was the solid brains which is the presentage of the percentage of Jensey was the solid brains where the presentage of the percentage of the percentage of the presentage of the percentage of t

do not like in the course of every summer to get into the cool and pure of that comes fresh from the bid d expine of ocean Hence every summing there is a rush to the nean side from Portland and all parts of the interior. In the change there is re-newal of health offen as marvelous, almost, as restoration of he dead to life It is especially marked in the case of young and educed has rule and exhaust on who inime it telt get new vita ity in the cooler air. The Astoriar's remark inout, the inhaltata so iked in habitaits of the interior, is a rheter cut extression not implying rity for our condition which really doesn't cul for sympathy but de adgred as in institution or exhibitation to us to come to Astoria and spend ances of dust and heat there are might boats and day touts and the passenger may take his choice of them sleering or not sleeping on the route as he may prefer One of the great inducements to go to the sea coast is the trip on the river and the Astorian is in error in supposing that any rulroad could offer as n any attractions or eschengiare a the great Communications fact that our frend eems to forget

In his recent add ass before the Civil Sers in his recent add ass before the Civil Service Reform Association George Will im Chriss attacks President Harrison for his failure to respond to the late Mr. Paarson postmaster of New York and defines civil service ruform to mem the exclusion of politics from the great multitude of prices in the civil service.

Civil erv ce referra a life i leut Hurrson defines it means u, field and efficient valle service. The excitation of police does not mean efficiency in the pub-o service for exerybody outside a the Curtis cult unfor stands that no administrate inserver if tent that omist oplace the principal public iff ces in the hands of the houest men who of Pear on He was at death a door when his term of office expired, he had governed aching administration. In id he sheen in good health he never outht to hive been rea of the health while empores by his letty ministens. The had the mind of a defil sergen it and fairly wore his poor ill paid en rets and fairly wore his poor ill paid en rets and other employe down to skin and bone with his die epline which was word, o that famous in litary knate the Lather of I red erick the Great Mr Curtis vij of Lear on His fatal Buess was audoubte 3 stemulate land

Aggrava ed by he is one struggle to do his o all duty against fremendous o t. Dv ng at li you such a men is within a marty to second as the hero who fals in partie. We shall be not ed numoraby Americans if a character so pure a life so sporters and a public service so great do oc consecrate us more devotable that a cer to be

the stomach an in numble constitution it is ease of which varioleou died and his finer before him. What would be thought of the samity of a biographer of Napoleon who should solemnly argue that if that great soldier had not been beaten at Leipsic and Waterloo he would not have died of career? Mr Curtis also denous ces the removals of for Postmaster General Wanamaker s recent

better problètte changes in fourth class postmanagement. Me. Curis is either stuped or distingenuous when, quoting Freddent Har-sloom's romark to Commissioner Tanner in regard to the stood's remark to Commissioner namer in regard to the pension bursen, "Treat the boys liberally," he assumes that by 'the boys' the president mount the political spoilsmen. Every old soldier knows that by 'the boys' in this connection the president

INTERNAL REVENUE COLLECTORS.

The tenure of collectors of internal rev enue is not for a fixed term. The New York

This fact has hitherto been regarded as favorable This fact has hisheric been regarded as favoration to a certain security of tenure in those offices not a very great security to be size but so much as cross from the nucle of taking the definite responsibility of removal. But the politicians now than that it haves the pro-d not tree to remove more rapidly and more promptly than in other cases, which would be a very expross interpretation indeed it rans other administration.

This is a remarkable statement. He are in much the fact first the New York Tones in

mind the fact that the New York Times is

the leeding mugwump newspaper of the country that it wo-ships Grover Cieveland and will have no other God before him. But its statement quoted above inches that it does not know that President Clevetand ones not know that President Cleveland made a 'clean sweep' in the offices of internal revenue leaving not a single republican in them throughout the whole United States Cleveland's appointees are still in the internal revenue offices, and this is the case in Oregon as elsewhere Whan Gereland began his whole-sale removals of collectors of internal retresale removals of collectors of internal revenue the senate at first refused to ratify the changes, and asked why the removals had been made. This called out a letter from Cleveland's secretary of the treasury in which it was confessed that the removals were made jurely on partisan grounds Learning that no accusations were made against the official integrity of the nea who had been removed, and that Mr Cleveland simply wanted to put his own partisans in office the senate declined to enter into a contest with him over the matter and confirmed the men who had been nomiciated by him But the affair was one of the most notable of the numerous exposures of the hypocrisy of Gereland's "reform" pretensions

#### TOI STOI

Same of our exchanges confuse the ident ity of Count Tol-tor the recently deceased Russian minister of the interior, with the famous Russian novelest and Christian so onlist, Folstoi The dead Russian states man is a compar tively obscure person— that is, he does not belong to the roll of leading Rus in state-men, while the living Tolstoi, autilior of "Anna Karemina" and other great works of fiction, is a man of the first order of literary genius a Christian come a choemaker in order to get nearer to the common people of Pussia, to whose elevation he is devoted boulething of a social crinic he is undoubted y, but he is gited with great and original genies as a writer of fiction. Of his personality Fiza

aliand by persons at leasure

There are few persons at the interior who o not like in the course of every sammer to stand but out pure are that comes from the coul and pure are that comes from the tirtuin faith. Making every allowance is the course of th inon the truth lath. Making every allown to f the proportion of delusion or allenated good action in 10th ca, he is probably closer than most of us to the gramples of Christianus. His sin-carity his simplants and unsufficience have done sportland so there is the which his renowal of an analytic of proceedings are done. and entire or retailing experiment was a useful harmony. His is a consecrated intelligence. The world never fall it expend to that,

### THE NON PRODUCTIVE GENICS

In 1886 there were 300 000 Jews in the Linted States, to-day their rumbers are es-timated at over 400,000 and it is pracheted that in the next century this republic will be to day nearly hall or the whol number of our money, which we will surely do as soon fast the hot excon sets in a tide for that there is no railroad will not deter un body there is no railroad will not deter un body. In Austra Rungary there are since i will go by river and would prein to go by river no matter how many railroads. States is due to legal disabilities they suffer there might be R ver tran portation is much cheaper than railroads could offer the boats tford more room that cars i as sengers are entire viree from the among in German) and Austria is not due to ins religious prejudice but to a social race hoand a fluence TheGerman Anti Somilie Un ton has its be diguarters at Large g and in cludes Christians, infidels radicals and con-servatives. There were 70 009 signers to the petition presented to bismarca in 1881 ask Is noted to discourage the banding of any anglor special legal measures to check the restrond of tetoria but merely to positions from na power of the Jews. But week 1 and namely that the river affolds the project of the interior excellent and attractive found the interior excellent and attractive forms the parton per ons who were perfouse of the tream kable at case of the Jews in the world of afford and to the many sounding ocean aide.

The ste Emperor Frederick of Germany in distriction by a project of the sterior of the parton of the part Senatic agitation by inviting the lealing Jews of Berlin to a court dinner. The Jew in Germany can date back their legal and pointical emunicipation only to the revolu-tion of 1848-49. They constitute but little more than I per cent of the inhabitant and nore than I per cent of the inhabitant and yet in business and in the learned professions the Jow leads to-day in Germany Phe author of the article in the Andover Acciet Professor George H Schodde says that in the University of Herlan thirdeon out of the forty two medical professors are Jewsthree out of the lifteen law professors, and therefore out of the suphty-scholar of the public scholar or the public scholar or the public scholar or the suphty-scholar of the public scholar or the suphty-scholar or the suphty-scholar or the suphty-scholar of the suphty-scholar or the suphty-scholar o three out of the eighty-eight of the philo-sophical ficulty. Of the serenty nine pro-lessors in the University of Big has ifficen are Jensie. The Jens constitute it is than five per cent, of the ropulation of Austria. and set nearly two hiths of the students at the university at Vienna in the winter seme ter of 1855 86 were of that race. Of the 600 lowyers in Vienna 550 are Jews and the 600 i wyers in Vienna 350 are Jews and of the 70 individuals regi tered as literary men in the provinces of lower fusting only forly five were not Jews. The great major ity of the newspapers of Berlin, Vienna, Frankfort Hamburg, and other German towns are backed by Jewish capital and edited by Jews. All except two of the Vienna newspapers have Jews as editors. In i rance also, journals in is falling into the hands of men of the same superports.

hands of men of the same race. In trade and finance the same superiority is marked. In Posen in Hangary and in Galicia the Jews monopolize all the non-producing callings and if they had a fur chance inter the law the same would be true in Russia. The purpose of the Anti-benutic Union in Germany is to abroate the point call and leaf engineering the Laws and ed and leg if emancipation of he Jews and place the n under special alien laws such as are enforced against them by Russia. But this is impossible under a fon ititational monarchy lik. Germans and is at war with nawoodly Americans if a character so pure a life to species and a public service so great do or conservate us more devotable that a term to cause for which he cad.

This is absurd. Pearson thied of cancer of the stomach an influence constitution is less ease of which varioleou died and his fixing case of which varioleous died and his fixin

The peculiar genius of the Jew as a man of affilm and a member of the learned unof affice and a member of the learned pro-fessions is quite as apparent in New Yorkcity as in Berlin or Vienna. Jews are conspicuous in the medical profession in the law, in trade and finance, and in journalism of the greatest navspapers in London, the Iclopaph, was brought to the front rank by Lawson 15 Hebrew proprietor Pulitzer, of the New York World, as a Hungarian Jew. kneage It is a matter of small consequence whether these men are of Jewish faith or not, they have the Jewish talent for busi-

Here he has a free field, such as he cannot find anywhere else in the world, for there are no slien laws in America that affect them, there is no public hostility of consequence, and there is no doubt that within ifty years the influence of the Jews in innance trade, the learned professions and other non productive employments will be enormously increased front even in Germany and Austria, in spite of organized political hostility and they urely will gel to the front in those callings, for which they have special talent in Amer

The early historical persecution political The early historical persecution political disabilities and hardships of the Jews have by the stress of circumstances fitted their admirably for all non-productive employments, save that of a soldier. The Jew is not often a farmer, seldom a soldier or sailor, a civil engineer, a railroad man, a miner or an artisan, but he takes readily intend to figures. It the learned product to tride, to finance, to the learned professions, to literature, to the dramatic and operation stage. The Jew in modern history has a brilli introcord within his peculiar limitations. With the exception of Thers, limitations. With the exception of Theers, the majority of the leading politicians and financiers of France since 1852 have been men of Jewish lineage. To the dramatic stage the Jew has given Raubel and Bernhardt, to music the composers Meyerheer, Mendellsohn and this singer Brabam, to literature Heine and Auerbich, to politics, Disraell, in England, and Lavalle, in Germany, to England, 1872, 577 George Legists. many to English law hir George Jessels, to finance every great banker in London, Paris, Vienna, Berlin and New Yorkeity It is a remarkable record for a people, small in numbers and widely scattered that they should everywhere show this astomshing aptitude for the non-productive pursuits of mankind In the dom un of pure scholar-ship and philology the Germans of Jewish incage stand in the first rank

#### TIN PLATE

The consolidation of the Chicago Rodling John Steel Company and the John Steel Company and the John Steel Company will embrace among its results the manufacture of tim plate. Tim plate was made in the United States as early as 1873 at Wellsville O and Lecchburg Pa

and in 1875 it was manufactured at Demmler, Pa These establishments continued in operation several years and turned out goods of superior quality but the British manu-facturers became starmed and reduced their facturers were driven out of business 1578 the United States imported from Great Britain 2 162 480 cmt of tin and terne piale The imports in 1879 rose to 3 II + 900 cwt and they have gradually augmented until in 1888 they reached a 84" 180 cut. During the 6f teen years from 18"4 to 1888 inclusive the Linted States has taken from Grat E Hain 2 672 524 tons of tin and terms plate p ying therefor in addition to transportation charges the enormous sum of \$220 000 000

facture, and tools confident of success pro-bably becau e the next congress is expected to increase the present duty of 1 cent a pound to 2 or 2% cents. Our experiment in manufacturing steel rails reduced their price one half, and it is predicted that the Chicago company will cheapen in olate goods enormously and distribute the vast sum of money now paid England to thous ands of American workmen in the form of was to be expended at home in support of themselves and their families.

At Willa Walla the singular proposit on is made of bonding the county in the sum of \$300 000 to induce Hunt to extend his rulroad into Union county, Oregon A county sometimes means a bonded debt for the purpose of getting a railroad for itself but this is the first time, we think, where it has been proposed to a county in one state to vote a debt upon itself for the jurpose of getting a railroad extended beyond its own limits into mother county in another state. If Walia Willia wants to tax herself for thirty years to give one of our Oregon cour-ties another ra road perhaps no ore in Oregon ought to con plan, but we must say we don thid such benevolence and dain teredness every day. In this case it is all the more singular from the fact that Walla Walla would not even be on the short line of transportation which its money would create. The shorter way by the Hunt line to and from Grand Ronde valley would be through a connection with Hant's branches in Oregon and thence to W. Buln. Bit even if At the Walla were on the line, it would only be a way station on a Northern Pacific Hunt road to Income However, we as ore citie Walla Walla's kindness towards an Oregon cou by all the mole from the fact that no county in our state is allowed to subs dize a railroad

To day throughout Wishington ferritory an election will be held of in tunbers or the constitutional convention that is to meet at Olympia on the Lourth of July Larty non-mations have been made in most place but since only two out of three members to be since only two out of the thermost to the elected in any district can be elected by one party there will be in opposition in the convertion amounting to at least one third of all its members.

Wonderful things have been do is in America during the fast four centuries and he probably never shall be able sufficiently to thank Christopher Columbus for having discovered into country. The latest thin, resulting from his discovery is the boom? ad over Oregon

Great Britain mount this great mission irv societies yet continues to manufacture idols for the natives of Africa and the South Sen islands Both these industries" are indeed of long standing and sometimes the missionaries and the idols go out on the

The pageantry of the centenni d of April 30 in New York cost about \$2,000,000. This sum exemites \$350,000 appropriated by the various states for taking care of their troops who were present on the occasion.

There is in prospect a ru h for the lands of the great Sioux reservation in Southern Dakota soon to be opened to settlement that is likely to beat the recent rush to Okla

### Is Over. Besults of the Med Bonn-Shrinkage of Infiated

Values The Soulthy Resotion

New York Tribune. BAN FRANCISCO, May 4.—The suddenness with which the gold excitement took possession of the two chief eities of Southern California lest week, and the exeduathat followed to the Banta Ciara and the exodus that for lowed to the Santa Ciara mines in Lower California, can only be explained by the extreme duliness of business in Los Angles and San Diego. Had the land boom still been on it would have been hard to secure a corporal's guard to ventue into the lower territory. As it was, for months the number of the untimployed in both cities had been growing larger. There was no work for them, and the problem of their hadintenance was beginning to be formidable. Several thousand men were thrown out of work by the suspension of operations on the branch of the Southern Pacifa relitored from San Luis to Santa Rachara: resigner/ment was the order of the colonies. Those who lired labor when they fan-cied they were on the high road to fortune by

land speculation now went to work in their own cratige groves or vineyards.

The result was a small army of idle mee, who would willingly have worked if they could have got an opportunity. This force was swelled by the "bummer" and train pelement that will not do an honest day's work as long as it can beg or steal enough to live on. All these people and many others who had become disguisted with the small profits of business in places where store-heaving, was small, brandon, texted for the small profits of dusiness in places where storeleeping was greatly overdone started for the
mines as soon as the first reports of rich disoverles of gold were aspposed to be corrobovarted.
The fever grew with every freels report, and
when returned miners came in with gold dust
and good sized nugge is the excitement became
intense. It is estimated that for a week 500 people every day left Los angeles and Sam Diego for
the new camp. Of crurse, in large cites this
number would seem stiffing, but San Diego has
not more than \$0,000. Hence, but San Diego has
not more than \$0,000. Hence, but dain soon carried
off all the enemployed, as well as meany low were
songged in active work. Railroad building, street
work, construction of houses, all were stopped by
lade of labovers. Robing like it has been sen
francisco was well night depopulated in the wind
rush to the placer mines about Suiter's mill; but
the unfortunate part, of this latest gold rush is
that the great majority of these who started out
with hopes are now tranging back, disgusted,
foot-sore, and "flat broke." The sceltement was
gotten up in cold bloof for a business purpose,
and the thousands of prospectors who rushed
over the border merely played the part of
"suckers."

The collapse of the Southern California land boom was as peculiar as its rise. The boom lasted about eighteen months, and was marked with extravagance only witnessed in this country in recent years at one or two points in Kansand Miscourt. The Edissout mon called a half-said miscourt was a series of the said to the said to

anys groves and vineyarus prougut from same to \$600 at a are.

The chief speculation, bowever, was in villa and town lota. The whole country about Los Angeles was ent up into colonics and dotted with flows size. There was no trouble in selling these small villa lots. In fact, men waited all night in line to get a chance to buy them. Men sold out before the day was over at a large advance on the purchase price. The usual method was to lay out a town, plant a large number of young cutally fine or pepper there should be avenue, lay flow a three-foot sidewalk of artificial stone in all the chief streets, and then advertise an auction all the chief streets, and then advertise an auction

bubble never witnessed a more fletitious value placed on property. A woman who owned sixty feet frontage on one of the objet business streets for Los Angeles was aftered \$500 a front foot for her property—a higher price than she could have obtained bad the property beam on Market street, in San Francisco. Yet blinded by the vision of what Los Angeles was to be within five years, she declined the offer. She would now be eager to sell for halt that price. Beats of stores were action that the price is sell for halt that price. Hents of stores were action rush of shopkeepers who desired to make zoney out of the thousands of bourists that any price was paid for accommodations in the main streets.

THE AWINDLED "TENDERFOOT."

What astonished one who came from another quarter of the state during the hight of the boom was the motive that induced Eastern people to pay from \$1000 to \$1500 for nnimproved land in any of the colonies around Los Angeles and San Bernardino. The land was ordinary Southern California land, capable or raising any orop with water, and especially sitted to oranges and raisin grapes. It was provided with water, but that was all. To plant it in an orange grove or vineyard would require at least \$100 an acre additional outley. Yet hundreds of people of small means brought such property with the absurd idea that the state of the crop was the property with the absurd idea that the state of the crop and demonstrated conclusively that such land as they intended purchasing would yield a net revenue of \$00 an acre when put mito oranges. The figures were cornert as far as hat particular grove was concerned, but the agent did not orapian that these inter were fifteen juers old had been cared for as carefully as ihough they were children, and these inter were fifteen juers old had been cared for as carefully as ihough they were children, and these inter were fifteen juers old had been cared for as carefully as ihough they were children, and these inter were fifteen juers old had been cared for he carefullous peoply wen as high as their heads the land had directed in value so that a grove in full bearing tould be bought for what they gas for barren land. Mans of them, however, had the pluck to work out their salvation, and to-day have good places, which promise to design or actually abandoned them.

And there is where we realize than a door nail.

Sought and elegant style of the French ketwastance spring up on every hand. The streets of Parador that seem the sory hand the streets of Parador than all the remainder of California. Eastlake cottages and villas of the light and elegant style of the French ketwastance spring up on every hand. The streets of Parador that seem the sory hand. The streets of Parador than a fire or eight pears. Los Angeles their is all the streets of Parador than of fire or eight pears. Los Angeles their is all of beautiful houses, set on the pocuresque hills that make this from more sightly even than stores are far binds one than the new buildings and stores are far binds one than the new buildings going up by the Golden Gate. At Riverside, in Ean Bernardino county, the boom did not rage so fereely as to other places, and the investors were generally persons of means, who had the money to improve their places. The result is that the Golden country and avenues of pepper and magnofia trees that are misqualed west of the Rocky mountains.

San Diego caught the land fever nearly a year later than Los Angeles, but whils it provailed it faily equaled the crass in the sival city. The

THE BOOM CITIES, MILLIES.

gained by the sharpers who foisted them on the ercedicing Eastern public.

THE BOOM CYTIES POTURE.

Los Angeles, as the head of a great collection of colonies and the natural railroad center of Southern California, will always enjoy a good trade, but the effort to demonstrate that it is a manufacturing town has resulted in failure. Its trade is peculiarly valuable because most of the outlying colonies are filled with people of means, who desire the best goods and buy liberally of luxuries upon which the profit is large.

But Son Diego has not this advantage of suburban colonies, and, judging from the growth of the towns user it, many years will be required to give it any large neighboring population. It is a watering place above all, and in climate, acensery and facilities for outdoor sports it is probably unabled to the control of the control of the profit of the profit of the control of the profit of the control of the profit of the control of the profit of the control of the profit of the profit

was an exceptional bargain, due to the great lack of ready money form he has been intered far more by its entoprists than by its critics. The absurd reports of fortunes to be made in orange absurd reports of fortunes to be made in orange. No one should expect to make a fortune in fruit growing in four or 8 vey sear. The profits in California are greater than in the East, but so are the risks. Most of the Southern California colonies offer peculiar inducements to those who seek pleasant outdoor occupation in a gen'al climate, free from extremes of temperature, and in neighborhoods where all the advantages of city life may be secured with none of its discomforts. To such these colonies offer the ideal life. But for those of mall means and no experience in horticulture the land is too dear and the risks of failure too great to warrant the experiment of fruit growing. These facts cannot be insisted upon too plainly, for the failure to spractiate them has led to the ruin of hundreds of Eastern settlers in the colonies of Southern California.

Boston Globs.
The intense patrionsm and unbridled partisanship of the inhabitants of this free country finds its chief rent in the naming of innocent and suresisting children after the forefathers of the republic and the chieftains past and present of party organiza-tions. They are the victims of these laudable passions, and it is safe to conjecture that they suffer more than foreign nations,

tions. They are the victims of these laudable passons, and it is safe to conjecture that they suffer more than foreign nations, whose aggressions are checked, or defeated politicians whose hunger and thirst for official thesh pots are denied gratification.

In any list of names selected at random there will be found a preponderance of the initials "G. W.," which always stand for the name of the father of his country. Next in order will be the "Benjamn Frankluns," and afterwards, in varving proportions, the "Thomas Jeffersons," "John Quincey Adamses," "Andrew Jacksons," "Martin Van Burens," "Wulliam Henry Harrisons," and so on down to the little boys and girls, whose growth is prevented by the burden of presidential and political names in the selection of which they were not consulted.

This habit of the American parent, who is at once a patrot and a party man, produces many amusing incongranties. The man who prefers baseball to books often rejoices in the name of the wise Franklin. Another, who, perhaps, resides abroad because he dilikes the conditions of life at home, may be a namesake of the man who was "First in war and first in peace." A recluse, who never votes and whose happiness is confined to the contents of his labrary shelves, very likely has to sign the name of Andrew Jackson to his letters. Other examples of this want of congruity between name and character might be cited if it were necessary to add further proof of this proposition.

Then there are the men themselves. The Smiths, Joneses and Robinsons are not made happier by Christinn names which are familiarly contracted to "Wash," "Jeff," "Quinny," or other of the diminutives applicable to a celebrated name. They are not inclined to obey the fifth commandment by honoring parents who forced them to use initials like "J. Q. A., "M. V. B." and "W. H. H.," at which strangers chucke and remark that some persons are not obliged to write the names in full because the first letters show what they are.

It Is the Worst Pest Ever Introduced

Lat Every Orchardist Get a Force Pump and a Suray N. zale and Go Forth To Do Battle

experiences that the hest results can be obtained.

The circular recently issued by the board is as

REMEDIES AGAINST THE CODLIN MOTE.

There are two modes of fighting them generally made use of—one is to prevent the hatching of the org, or the killing of the young worm while working into the fruit; the other is the catching of the worm in traps sat it is excaning from the fruit, or by having the fruit eaten by hogs as soon as it drops from the tree and before the worm escapes. The first mode is no doubt the most successful, and is also the least expensive. This is secomplished by spraying the trees with London purple or Paris green, using one pound of either to 150 gailons of water. Paris green is a compound of arcenic and copper. It is a far more powerful poison than arsenic alone, and is not solible in water, hence it was a first of the second parishment of the second parishment when longer on the trees. London parishment much longer on the trees. London residue from the manufacture of amiline day and contains lime, arcenicus soid and carbonuccous matter. It is soluble, more adhestive and less poisonous than Paris green, and therefore is to be preferred. It is better to wet the powder thoroughly and make a peats before putting it into the vessel of water that it may not form lumps. The spray is caused by forcing the liquid by means of a forcepump through a fine perforated normal made specially for the furpose. The finer it is the less liquid will be required. The important thing is to seatter the spray on all the fruit.

The codilin moth, soon after the fruit sets, lays her eggs upon the calys end of the young truit. The grob as soon as hatched eats its way into the control of the young truit, and there, growing the control of the young fruit, and there, growing the control of the young fruit and there, growing the control of the young fruit is each its cally a president to the young fruit is each its cally a president to the young fruit is each its cally and the least particle of polsoned waler falling upon it is sufficient to destroy the young worm when it is sufficient to eat its way into the fruit; therefore, the best and most opportune time for spraying the trees is soon after the fruit is est, and when it is about the size of a small pea. Experience teaches, however, that it is not safe to depend upon the one sarry spraying to accomplish the results sought for, whether coming from a second and perhaps third crop, which many aftern and others den, or from those that from some cause have not matured as rapidly as others, still the facts remain that in many places the caps and the contouring the property of the contouring with an interval of two weeks until the first of July, and even later than the contouring with an interval of two weeks until the first of July, and even later than the on some late varioties. Care should be observed that vegetables are not sprayed with these mixtures, and so animals be allowed to eat the grass that has been saturated with the spray.

THE GREEN APRIL The use of the above mentioned sprays will be of great value to the orchard in not only ridding it of the codling moth, but they will also be found beneficial in freeing if from many other obnoxious insects and foung that are a source of great anuoyance and often of great danger to the trees and fruit. There are a number of mixtures that will operate successfully in exterminating the green aphis or apple tree logist, and can be used as most convenient to be produced:

First—Take one-half pound borax soun, one-half think teroseme oil; max us two and one-half aphis or apple tree louis, and can be used as most convenient to be produced:

First—Take one-half pound borax suap, one-third plat kerosene of; mix in two and one-half gailons but water.

Second—One pound of whale oil soap dissolved in three gallons hot water.

And still a hird which is easily procured.

One pound of common laundry coap dissolved in sixteen gallons of hot water.

Apply any of these mixtures by means of a spray pump where the aphis bogin to show themselves.

and durther proof of the propositions say to the series of the proof of the proposition of the proof of the p

### AN EDUCATED FARMER.

The time has come when, to be successful

narrows down and the margin of action grows smaller, the better must a man be equipped for the battle of life, if he expects to be successful.

This is as true of the farmer as of anyone clee. The time has passed for farmers to depend on muscle and hard labor alone. They must use their brains as well as hands. They must do more thinking and planning if they desire to receive best results.

The farmer who rends and studies is the one who works to a purpose, while the one who works to a purpose, while the one who does not read is the one who makes his effort at hapharard. The former is posted on the markets and, from long study, is able to draw conclusions and form pretty correct ideas of what it will be to his interest to raise for those markets.

Then, again, the educated farmer is always

for those markets.

Then, again, thoeducated farmer is always posted in everything pertaining to his business, and is ready to be the first to take advantage of a new and valuable discovery,

rantage of a new and valuable discovery, and every year there are many valuable discoveries made in the agricultural world. There are cheaper and more convenent methods of performing farm labor; ways by which better returns are secured from the same amount of soil and work; newer and more satisfactory methods of caring for stock and of feeding and pasturing the sume; and many other discoveries, trifling and insignificant in themselves, but which in the aggregate, amount to a great deal in a long

significant in themselves, but which in the aggregate, amount to a great deal in a long run.

The uneducated farmer—the one who does not read—is the one who treats small matters as unworthy of any thought or attention, and who too often walks over dollars in a mad classe after phantom gold pieces. And yet, it is the small things most often that constitute the profit.

The educated farmer knows how to save. He understands the value of conomy. He knows how to obtain the greatest results at the least expense. He knows how to secure the greatest yield from a given amount of ground. He knows what crops to cultivate, and when and where to market his products. He is posted in the new and heat varieties of seeds, and also the best varieties of stock. He has the advantage of the experience of other men, because he reads.

Farming is a science, and there are many new things to learn in it yet; and the best and cheapest way to learn those things is by study. Take agricultural papers, read in their columns the expendences and observations of others, and avail yourself of the many useful hints and suggestions and thus keep up with the procession.

"Farming is no longer profitable," some

many userul inits and suggestions and that keep up with the procession.

"Farming is no longer profitable," some men cry, when the fact is they do not find it so for the reason that they are away behind the procession and are attempting to run on the old plan of all muscle work and no brain work.—Thomas P. Montfort, in Prairie Farmer.

PREIGHT BATES ON FRUIT.

Californians are seriously considering this question and say the future of the green fruit trade depends on securing better rates. It is intimated that they are trying to oring the interstate commerce act into disrepute by charging these rates upon the working of by charging these rates upon the working of that law. The long and short haul operates, no doubt, somewhat to the disadvantage of producers, but the commission have power to suspend its operation in case the act works a hardship by its enforcement. It might be well to call the attention of the commission to this matter and seek for an alleriation of the tax imposed on fruit production, as it threatens disaster to every important and growing interest.

THE LAST WORD ON EMERSON.

Boston Herald.

What Dr. Emerson says about his father
must be taken as final testimony; and his
witness as to his father's religious beliefs must be taken as final testimony; and his witness as to his father's religious beliefs confirms all that has heretofore been said of the symmetry and harmony of hir life. Emerson's opinions were as fixed in substantial facts in 1840 as they were in 1870. He believed in God in spirit, not in forms, and his definition of the spiritanl was that it was the most real part of life. God lived as truly to him in the present moment as in the net of creation, and he allowed no mediation between the Creator and the creature. Dr. Emerson affirms that the essay on "Self-Reliance," rightly read, strikes the highest note in highest respectively read, strikes the highest note in highest respectively read, strikes the highest note in highest net in manner that "Self-Reliance, the heightt and perfection of man, is reliance out God." To him beauty, goodness and wiside n were equivalent terms, as heat, motion and chemical action were to the physicist. This high belief in Emerson was something more than optimism; it went beyond hope; it was a grent and absolute trust in God. He wrote in 1841: "My creed is very simple, that goodness alone can we trust, to that we may trust all and always; beautiful and blessed and blessing is it even though it should seem to slay me. Beyond this I have no knowledge, no intelligence of methods; I know no steps, no degrees, no favorite means, no detached rules. Itself is mate and road and leader and march." This is substantially the extent to which Dr. Emerson goes in affirming his father's apiritual belief, and that is the final word to be said. Within these limits Emerson lived and thought, and thus in the said or thought or did. Rightly understood, Emerson reached very near the heart of things. This confirmation of the direction of his highest thought is the most valuable part of Dr. Emerson's contribution to our knowledge of his father's life.

A Couspiracy Against the Carr.

Sr. Petersoure, May 13.—A conspiracy

A Conspiracy Against the Car.

St. Petersburg, May 13.—A conspiracy has been discovered among military officials. A large number of conspirators have been arrested. In their possession were papers which proved that they intended to assassinate the czar. A number of bombs ware found.

A Victory for Socialists.

Paris, May 13.—The municipal election held at Narbonne yesterday resulted in a victory for the socialist candidates. The socialists, hended by Ferroul, member of the chamber of deputies, paraded the streets, singing the "Marsellaise."

New Officials at Work.

Washington, May 13.—Judge Matthews, who succeeds Judge Durham as first compitroller of the treasury, and Huston, who succeeds Hyatt as treasurer of the United States, entered upon the discharge of their new duties this morning.

Working Men Injured.

New York, May 13.—The gable wall of an old house on Spring street that was being torn down, fell at noon while seven men were at work. Two were killed and another will hardly live.

Wishington, May 13.—The court of claims to-day dismissed the case of Kincard and Guessman against the United States, this being a claim for the rent of property in Alacka.

Two Brothers Killed.

Porrisouri, O., May 13.—At a dance in the country near here Saturday evening, in a quarrel Henry Nicolls shot and killed Wison and Amos Carr, brothers, and then escaped.

A Steamer Disabled.

Lyttelius, N. Z., May 13.—The steamer lone, hence May 2, for London, has returned with a crank shaft broken. Mails nave been forwarded by way of San Francisco.

Hauled Down the Flag.
The Hager, May 13.—Last night a number of socialists hauled down the royalist standard and hoisted the socialist flag in its place.

Washington Irving Bish p Dead New York, May 13.—Washington Irving Bishop, the mind reader died here this afternoon of hysterical entalepsy.

To Visit the Emperor.

Berlin, May 13—Emperor William will receive a delegation from the striking miners from Westphaha to-morrow. Eastern Temperature: New York, 58, Chucago, 66; 5t, Paul, 56, Winnings, 40; New Orleans, 63.

The President's Return.

WASHINGTON, May 13—The president and party have returned from their trip upon the steamer.

The hab of Persis.
St. Petersson, May 13.—The shah of Persis has left Teheran for St. Petersburg. Prejudice and ignorance have given way to immous Liver Regulator. It has atood the test, Furchase your tackets and reserve your sleeping car accommodation at No. 121 First street, corner Washington, office Northern Pacific Esilroad.

THE CRUISER (HARLESTON.

essary 7000 horse-power in another trial. I appears that the trouble with the port en essary 7000 norse-power in another time.

appears that the trouble with the port engine is located in the goose-head guide, which was the only faulty spot shown it the trip from San Francisco. When the fault developed, resource was had to the device of placing a shim, or a this wedge of metal, between the troublesome points, and this expedient was probably not sufficient to meet the case. The trouble is not serious and can be remedied aboard ship, if indeed it has not been done already. The fact that the beilers made steam so rapidly that they were blowing off during the trial is regarded by engineers as a promising realization of the borse-power requirement when the defect in the portengine is corrected and the steam can be used. There is an increased speed looked for upon the next trial, because of the coal hemg used up rapidly and the vessel being lightened.

THE STRIKE SPREADING.

A number of strikers at Castrep attempted to make a riotous demonstration and were dispersed by dragoons. There was raidom firing between the strikers and military at that place last night. At Lucizes the taverns have been closed. The strike committee of Darimund miners have issued a manifesto in which they declare that the strikers will not resume work until al demands are complied with. The miners in the Essen district have struck. This roles the total of men who have quit work to 90,000.

A Number of Fine Racers Disposed of at Abetion at Cleveland. Abetion at Cleveland.

CLEVELAND, May 13.—The fourth annual horse sale by W. B. Fasig, was begun to-day. Among the borses sold were: Helen McGregor, with foal, to W. R. Crawford, of Lexugton, Ky., for \$1050; Zelda, to same, for \$1550; Miss Greichen, a sister of Clingstone, to Joveph Bader, of Philadelphia, for \$1800; Leontine, to J. I. Case, of Racine, Wis., for \$1350; Joshua. to Wm. Cole. of Cleveland, Ohio, for \$1200; Mambrino Sparkle, with a record of 2:17, to E. M. Clough, of Minneapolis, Minn., for \$3850; Lady Leontino, to C. J. Hamblin, of Buffalo, for \$1300; Mintle S., to J. I. Case, of Racine, for \$1000; Guy,

#### BAILROAD CONDUCTORS.

SPOKANE WILL BE THERE.

A Kentucky Race Which Promises to be
More Exciting Than the Derby.
LOUISVILLE, May 13.—The Clark stake to
be run for Thursday will have more starters
than the Derby and will be in some respects
a more exciting event. Spokane will certainly be in it and all the Derby horses except Hindoo Craft and Bookmaker, who are
permanently broken down. In addition cept Hindoo Craft and Dookmaker, who never permanently broken down. In addition there will be two or three Californians, including Sensior Hearst's Robin Head. Bald. ling Senator Hearst's Robin Head. Bald-will have at least one, and probably two.

ABRESTED FOR GAMBLING.

London Police Raid Two Aristocratic Sporting Clubs.

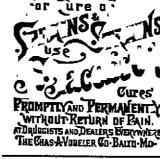

Losnon, May 13.—The persons arrested yesterday in the raids on the Fielc and Adelphi clubs, were arraigned this morning. The Earl of Dudly and Lord Lurgan were among the prisoners. The police admitted that they were not members of the kield Club, but that they resorted there for the purpose of gambling. The cases were continued for one week.

On the Throno Again.
THE HAGUE, May 13.—Many congratulatory telegrams have been received by the
king from foreign rulers and other no ables
upon the occasion of his resumption of government duties. The streets are decorated,
thanksgiving services are bring held ard the
city is illuminated.

The New Civil Service Commissioner.
Washington, May 13—Theodore I consevelt, of New York, recently appointed civil service commissioner, took the oath of office this morning. The board is now full. Commissioner Lyman was chosen president. It never failed to cure Dyspepsis and Live Compiaint. Take Slumons Liver Regulator.

Mistaken for a Burglar.

Breingfield, Mass., May 13.—James B.
Smith, local editor of the Republicar, was
shot and killed this morning by his brotherin-law, Royal H. Sturtevant. He was mistaken for a burglar.

THE HISTORY OF A LAVE BOOM.

THE GREAT COLLAPSE

ollar.

His example could be multiplied in every place a Southern California. Few of the old settlers too made fortunes by the rapid rise in the values of land were shrewd caough to draw out and in-

REMINDERS OF THE BOOM

FIGHT THE JODLIN MOTH.

Into the State of Oregon.

The state board of harliculture has inaugurated

The state board of horizonture has inaugurated a war of externaination against the codiin moth which the board comisions "the worst post ever introduced into the state." In a circular just issued the board sets forth the necessity for immediate action. Here is a sentiment that orchardists will appreciate:

The time has arrived when every person having an orchard should be the owner of a force pump with a spray nextle specially adapted to the work of spraying t was. Where one person has not sufficient use for a pump to justify him in bring one for himself alone, for this join with a bring one for himself alone, for this join with a sill. The cost of the material and the time required in applying it is small. London purple or Paris green costs but 25 cents per pound insmall quantities, and pumps all complete, ready for use, can be had from 314 to 534 each, according to size and capacity for work.

It is the desire of the board to do all they can in accomplishing the results sought in the enactment of the law creating them, and to this end bespeak the co-operation of every person interested in horizonture in Oregon. The secretary desires to secure the usune and address of every fruit grower in Oregon. He also desires that all shall write him freely relative to their experience in combatting these common enemies of the orchardist, for it is only by an interchange of experiences that the best results can be obtained.

WHEN TO SPRAY.

CREAMERY VS. DAIRY.

tact is a great thing. Money is a great thing. Genius is a great thing. These are all good things and great he.ps to success; but far greater yet is education. As competition
